## Research Interest

My passion is the quest for understanding and modeling visual intelligence in humans, particularly in applications involving behavior understanding, navigation, and reasoning. The research problems that I would like to pursue include learning with limited data, generalizing concepts across different domains, and learning data representations without labels through unsupervised or weakly supervised methods. I would like to apply solutions to these problems in different domains, including intelligent mobility and robotics.

## Education

### Worcester Polytechnic Institute

Worcester, Massachusetts, USA

M.SC. ROBOTICS ENGINEERING, GPA: 4.0/4.0

Jan 2017 - Aug 2018

- **Honda Research Institute**, San Jose, CA — *Research Internship Program Spring, Summer 2018*

### Vellore Institute of Technology

Vellore, India

B.TECH. IN ELECTRONICS AND INSTRUMENTATION, GPA: 8.79/10

July 2012 - May 2016

- **Carnegie Mellon University**, Pittsburgh, PA — *Semester Abroad Fall 2015, Spring 2016*

## Research Experience

### Kinetic Automation

Palo Alto, California, USA

RESEARCH ENGINEER

Oct 2021 -

Developing 3D Machine Vision algorithms for Autonomous Driving and Electric Vehicles maintenance.

Responsible for simulation, data creation, algorithm design, and deployment.

### Honda Research Institute

San Jose, California, USA

RESEARCH ENGINEER

Jan 2018-Oct 2021

Worked on 3D scene understanding research topics like 3D Mapping using LiDAR sensor, sensor fusion with GPS-IMU sensors, 3D detection, joint 2D-3D multiobject tracking, action recognition, future trajectory forecast.

### Carnegie Mellon University

Pittsburgh, Pennsylvania, USA

VISITING SCHOLAR, MACHINE LEARNING DEPARTMENT

May 17-Aug 17

Under the supervision of Katerina Fragkiadaki, worked on developing Ego-motion estimation for UAVs with low cost sensors (Monocular Camera, IMU) using Deep Learning Techniques. IMU sensor is used to overcome the problem of less or no visual correspondences during fast motion.

Pittsburgh, Pennsylvania, USA

RESEARCH ASSOCIATE, FIELD ROBOTICS CENTER

Sept 15-April 16

Under the supervision of Sebastian Scherer, for the application of Industrial inspection with UAVs, I worked on system integration, control and real-time coverage planner to optimize flight time.

## Teaching

---

### Worcester Polytechnic Institute

*Tutor*

ELECTRICAL AND COMPUTER ENGINEERING DESIGN, ECE 2799

*Spring 2017*

In Spring 2017, I was the tutor for the course ECE 2799. Half of the course is project based and I supervised the electronics projects.

*Teaching Assistant*

SYNERGY OF HUMAN AND ROBOTIC SYSTEMS, RBE 595

*Fall 2017*

In Fall 2017 I was the Teaching Assistant for the course RBE 595, which is an advanced course designed for project-based robot design. I was part of grading the students assignments and tests. And help the students with questions in the class.
